FLORADALE ROAD CLOSURE

We wish to inform you of an upcoming road closure on Floradale Road scheduled to occur sometime in mid-November.

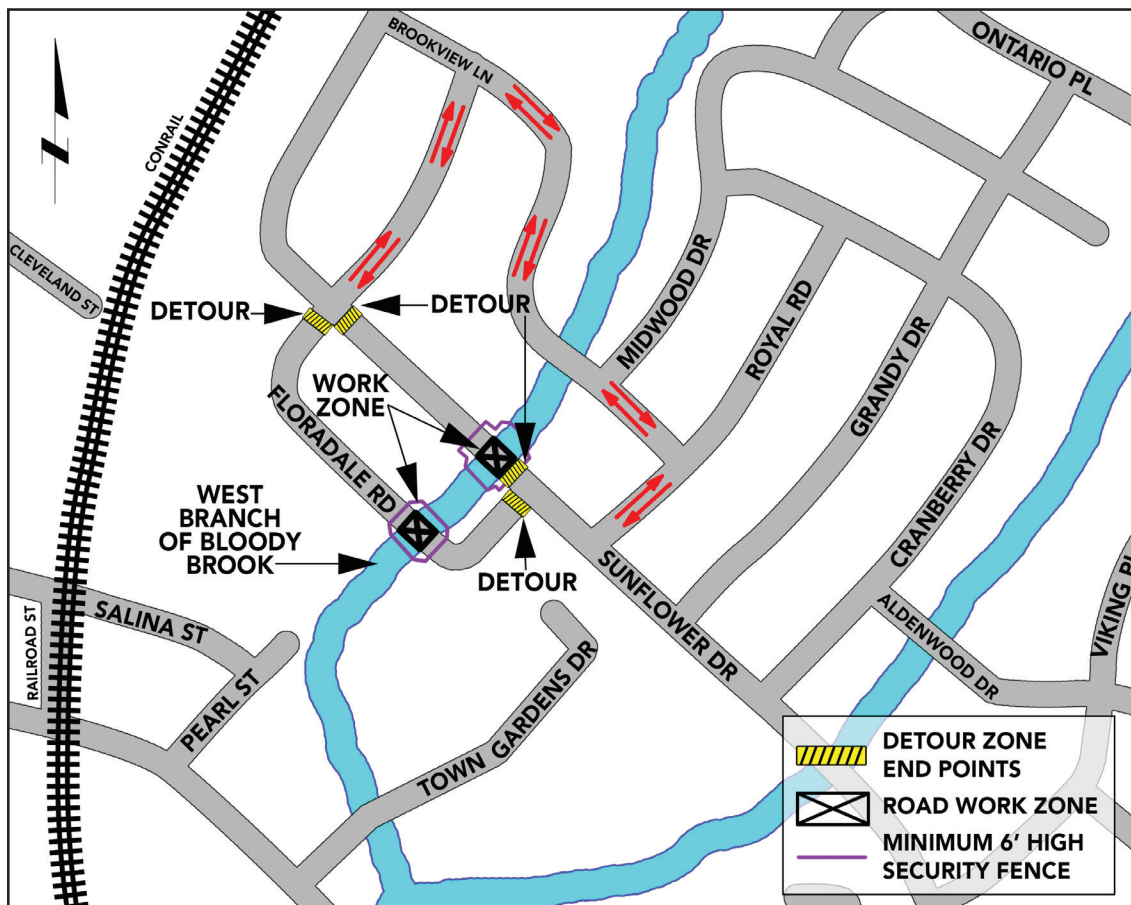

As you may be aware, Lockheed Martin is conducting environmental remediation activities to remove cadmium contamination along the West Branch of Bloody Brook. As part of these activities, Lockheed Martin has agreed to design and complete the replacement of certain culverts that convey the West Branch of Bloody Brook under the roadways within the limits of the site. The culvert under Brookview Lane was replaced in August and September, the culvert under Sunflower Drive is currently being replaced, and the culvert under Floradale Road is scheduled

to be replaced beginning in mid-November. During the replacement of the culvert, the section of Floradale Road west of Sunflower Drive will be closed to through traffic between its two intersections with Sunflower Drive. As shown on the attached figure, Brookview Lane will be used as a detour route while both the Sunflower Drive and Floradale Road culvert construction activities are taking place. Once the Sunflower Drive culvert is complete, the road will be reopened and Brookview Lane will no longer be used as the detour.

In order to conduct the culvert replacement and close part of Floradale Road, Lockheed Martin worked with the Town of Salina to develop a Maintenance and Traffic Control

Plan. The work will be conducted in accordance to this plan which ensures the safety and the least amount of disturbance to the community as possible. Residents and local organizations serving the community are all being informed of the road closure and traffic detour routes. This includes, but is not limited to, the local police, fire, bus and ambulance services, and the United States Postal Service.

Residents with questions or concerns about the road closure or cleanup activities are encouraged to call the Bloody Brook Information Line at 315-456-2150.

Brookview Lane will be used as a detour for both the Sunflower Drive and Floradale Road closures as shown by the red arrows. Sunflower Drive will be reopened as soon as the culvert work there is completed.
