

RELY3D[®]

Maintenance support at your fingertips

RELY3D

Lockheed Martin. Your Mission is Ours.®

TRANSFORMING MAINTENANCE

RELY3D is an interactive suite of applications that empowers maintainers with virtual guides, 3-D animations, wiring diagrams and more. Using off-the-shelf software and Lockheed Martin proprietary processes, RELY3D uses an intuitive interface to place high-fidelity, technically accurate 3-D models into the hands of maintainers via a mobile tablet or laptop. With RELY3D, maintainers can troubleshoot and perform maintenance on the flight line, dramatically reducing cost and increasing system availability.

FEATURES

- 3-D representation of part data with removal and installation animations
- Wiring diagrams
- Interactive fault message inputs with matching LRM, fault isolation procedure (FIP) and wire code (WC)
- Compatible with many Lockheed Martin products
- Visual environment eliminates language barriers
